From the Principal's Desk

The analysis of the recently published S4 University results except CE branch (2009 Admission) is shown below:

Particulars	Pass Percentage				
	ME	PE	CSE	EEE	ECE
Boys	58	23	22	39.5	37.5
Girls	-	72	96	87	73.5
Overall Results	58	33	72	66	61

The wide variation in the pass percentage between boys and girls uniformly in all the branches is to be viewed seriously.

Dear Vidya Boys,

What is happening to you? This may be a general trend in Kerala. But can we just leave it as such. If you cannot achieve the simple target of a B. Tech Degree in time, what future can you expect? The fact that one should acquire a lot other skills apart from your results percentage as per the present employment requirement, how will you manage with these backlogs?

The Indian family culture revolves around and depends a lot on the male generation. You cannot survive without a decent job while the other gender can still manage. This being a fact, you boys cannot afford to have such examination debacles.

There could be physical and mental changes that are happening to boys in the late teens, but you should develop the right attitude if you have to achieve your goals.

I am confident that Vidya boys will take it in the right spirit. The future results will prove your capabilities. You were all so bright and talented and that is how you got into the Engineering stream in Vidya. Nothing should change your target.

Dear Girls,

Congratulations for your excellent performance. Also remember, the boys are fast runners and you should maintain and aim higher and do not allow them to overtake you.

With best wishes,

Dr. S P Subramanian
Principal
